

Company Profile

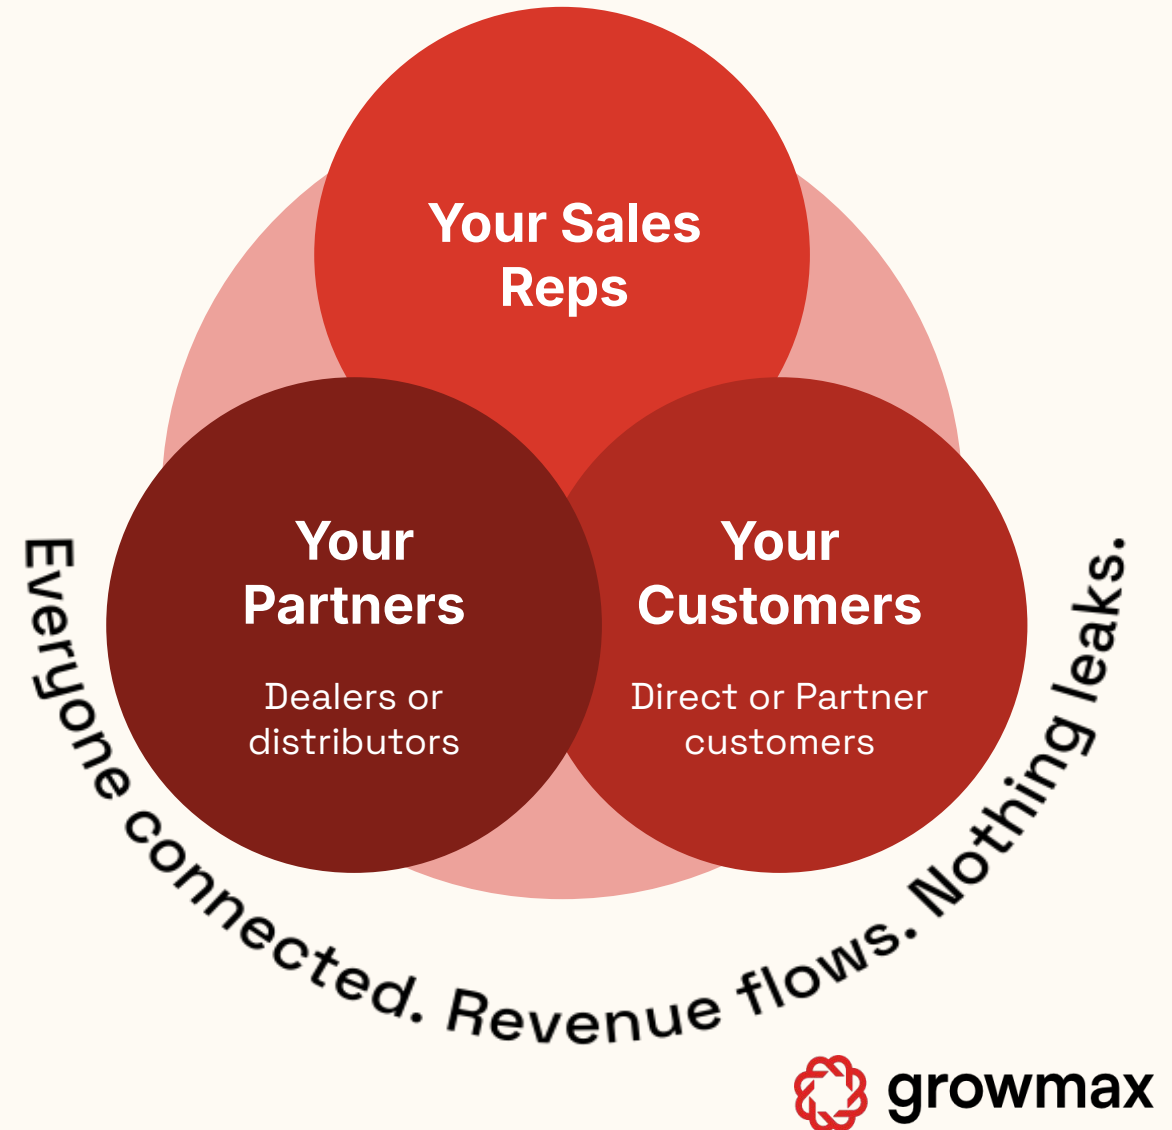

Intelligent Revenue Operations
Platform for B2B Manufacturers
& Distributors

Building the connected B2B revenue platform.

We deliver the connected platform that handles **customer self ordering portal** to **sales quote & pricing** to **partner portal & fulfillment** that replace disconnected spreadsheets, manual quote workflows, and siloed ERPs.

Industrial | Electrical | Construction Equipment
| Building Materials

One platform. End-to-end revenue operations.

Customer & Partner Portals

Autonomous customer and dealer portals with own pricing, quotes, orders, payments, and tracking.

Quote-to-Cash

Complete RFQ → Quote → Approval → PO → Invoice workflow with version control and multi-level approvals.

Multi-Warehouse

Role-based access across 50+ locations. Zone intelligence, inventory visibility, and branch-level management.

SAP Integration

Native two-way SAP ECC integration with JCo. No middleware, no data exposure. Bidirectional RFC calls.

Multi-Tier Pricing

Customer-specific pricing with product, tier, volume, time period, and customer-level rules. SPAs and margin controls built in.

Analytics & Insights

Revenue analytics, order tracking, customer intelligence, and performance dashboards across all channels.

Ideal Customer Profile & Market Opportunity

Market Size

US\$ 780 M in 2020; estimated to grow @12% YoY

Geography

India, USA, Europe & Middle-east

Competition

Salesforce, Adobe, Shopify Plus, Commercetools, Volution, Optimizely, VTEX

Industry

Distributors, Wholesalers & Industrial Manufacturers

Budget

~ SaaS 50-100k
~ 150k+ deal size

Pain Points

Automating their sales process & Increasing sales team productivity

Company Size

>\$100 M - \$1B
Mid-market Enterprise

Decision Makers

CEO, CRO, CMO

Technologies

Cloud, SAP, Salesforce CRM, Shopify

Enterprise-grade. Cloud-native. Built for scale.

“Limitless customization & personalization”

“Decoupled backend giving complete flexibility”

“Complete omnichannel experience”

Systems of Record

Technology stack

- Growmax commerce cloud is hosted on AWS with Microservice architecture on a K8s infrastructure. This is mainly to ensure our system is highly scalable & secure for our customers.
- Build the portal using Next JS framework on React as a PWA application covering both Mobile & Web users

Security & Compliance Highlights

- **Penetration Testing** aligned with OWASP Top 10 standards for web application security.
- **Zero Critical Vulnerabilities** post-remediation from the latest assessment.
- **Continuous** Vulnerability Scanning integrated into development & deployment cycles.
- **Data Encryption at Rest & In Transit** ensuring protection of sensitive information.
- **Role-Based Access Control (RBAC)** to limit exposure and maintain data privacy.

“Your data. Your Control. Always.”

Built by people who know the industry.

Partner Commerce Platform for Siemens

CASE STUDY

Siemens is one of the world's leading manufacturers of low-voltage and medium-voltage switchgear, offering comprehensive electrical distribution solutions for industrial, commercial, and infrastructure applications.

The Siemens logo, consisting of the word "SIEMENS" in a bold, teal, sans-serif font.

Challenge

Siemens' sales teams & partner ecosystem prioritize top 20% customers driving 80% revenue, leaving smaller contractors and panel builders underserved despite significant collective volume and opportunity.

What We Did

- Growmax is rolling out our intelligent connected revenue operations platform between Siemens' internal inside sales teams, channel partners, and this underserved 80% customer base.
- Growmax creates scalable digital sales reps serving high-volume, lower-touch customers profitably.
- We enable Siemens to monetize underserved customers without increasing sales costs.
- Go live in India, Indonesia, Vietnam & Thailand by April 2026
- 300+ partners & 100K+ customers with integrated payment directly to partners

Spares Portal for Schwing Stetter

CASE STUDY

Schwing Stetter India, is a leading manufacturer of concrete construction equipment. It produces concrete batching plants, truck mixers, concrete pumps, and recycling plants, serving major infrastructure and real estate projects across the country.

Challenge

Schwing has **50+** sales offices with **800+** service engineers and **58** warehouses across India with more than **20K customers**.

Their service engineers used to manually give quote, order & their customers were unhappy because of delayed quotes and order process.

What We Did

- Created an AWS based architecture supports their scale & growth
- Unified customer experience portal for them to place orders at their contracted prices & their service engineers creating quotes & orders on the move
- Tightly integrated with their backend SAP ECC so that customer get the post order statuses on their portal

Scaling Partner Engagement for OBO Bettermann

CASE STUDY

OBO Bettermann is the German multinational, supplying electrical installation systems – cable support/routing, underfloor solutions, and safety products like lightning, surge and earthing protection – for industrial and commercial projects.

Challenge

OBO Bettermann India wanted to digitize its B2B selling process to improve customer experience and partner engagement across a 200+ dealer network, with 70+ internal staff users supporting the channel.

What We Did

- Launched a Partner Commerce Portal for self-service quoting, ordering, and tracking tailored to dealers.
- Integrated with ERP for price lists, credit, inventory, and order sync; set up role-based access and approvals.
- Built engagement visibility, dashboards, and alerts to track adoption and drive continuous improvements.
