

The Intelligent Revenue Operations Platform.

Your Sales. Your Dealers. Your ERP. Finally Connected.

Built for B2B Manufacturers & Distributors who need depth.

What we do?

We help manufacturers and distributors stop revenue from leaking through disconnected systems.

Trusted by manufacturers who chose depth over hype.

Why generic platforms breakdown?

B2B commerce has different DNA. We built from scratch.

What B2C platforms assume	What your business needs
• One price for everyone	• Customer-specific pricing
• Instant checkout	• Quote → Approval -> PO -> Invoice
• One warehouse	• Multi-branch, multi-warehouse
• Anonymous buyers	• Long-term partnership relationships
• Simple cart	• 100-line quotes with version control
• Credit card or UPI payment	• Net 30/45/60 payment terms

"We tried "X" platform. Spent 8 months customizing. Still couldn't handle customer-specific pricing."

— Common story we hear

The revenue leaks we fix

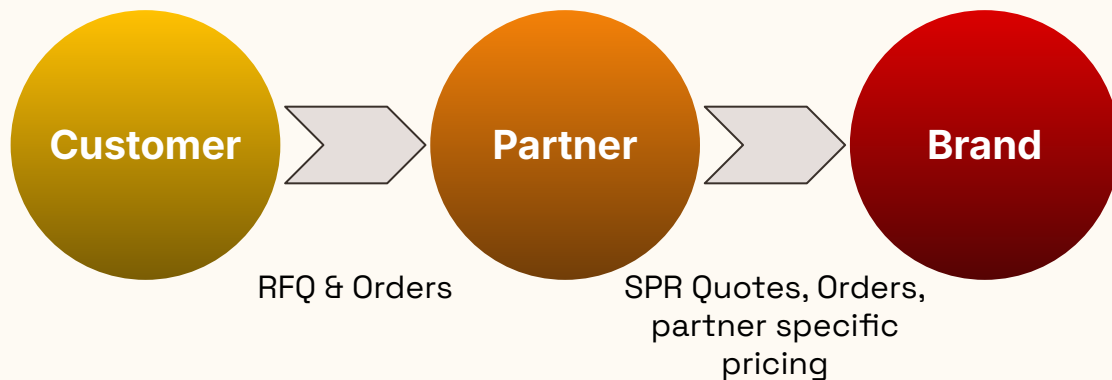

1. **Pricing complexity:** Customer A gets 15% & Customer B gets 18.5% discount, Special Price overrides for large orders
2. **Approval bottlenecks:** Quote request -> Manager approval -> Director approval -> Converted to order with no edits
3. **Multi-branch and warehouse:** Sales reps from different branches send quotes or orders to different warehouses
4. **Quote Management:** 100s of line item quotes, version control, validity periods, quote-to-order tracking
5. **Payment Terms:** Net 30/45/60, payment against delivery, cash discounts, packing & forwarding costs
6. **ERP Integration:** Two-way real-time sync for inventory, customers, orders & invoices
7. **Partner Portal:** When you sell through your partner network, let your partner to receive orders and send quotes

“These aren’t nice to have features. They’re daily business flows.”

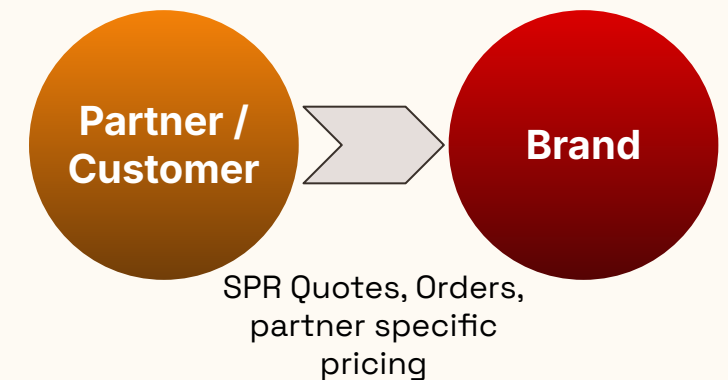

The Intelligent Revenue Operations Platform

“Empowering B2B revenues and data-driven growth across the value chain.”

Model 1: Customer-Partner-Brand Flow

Model 2: Customer / Partner-Brand Flow

Agentic AI powered (In development)

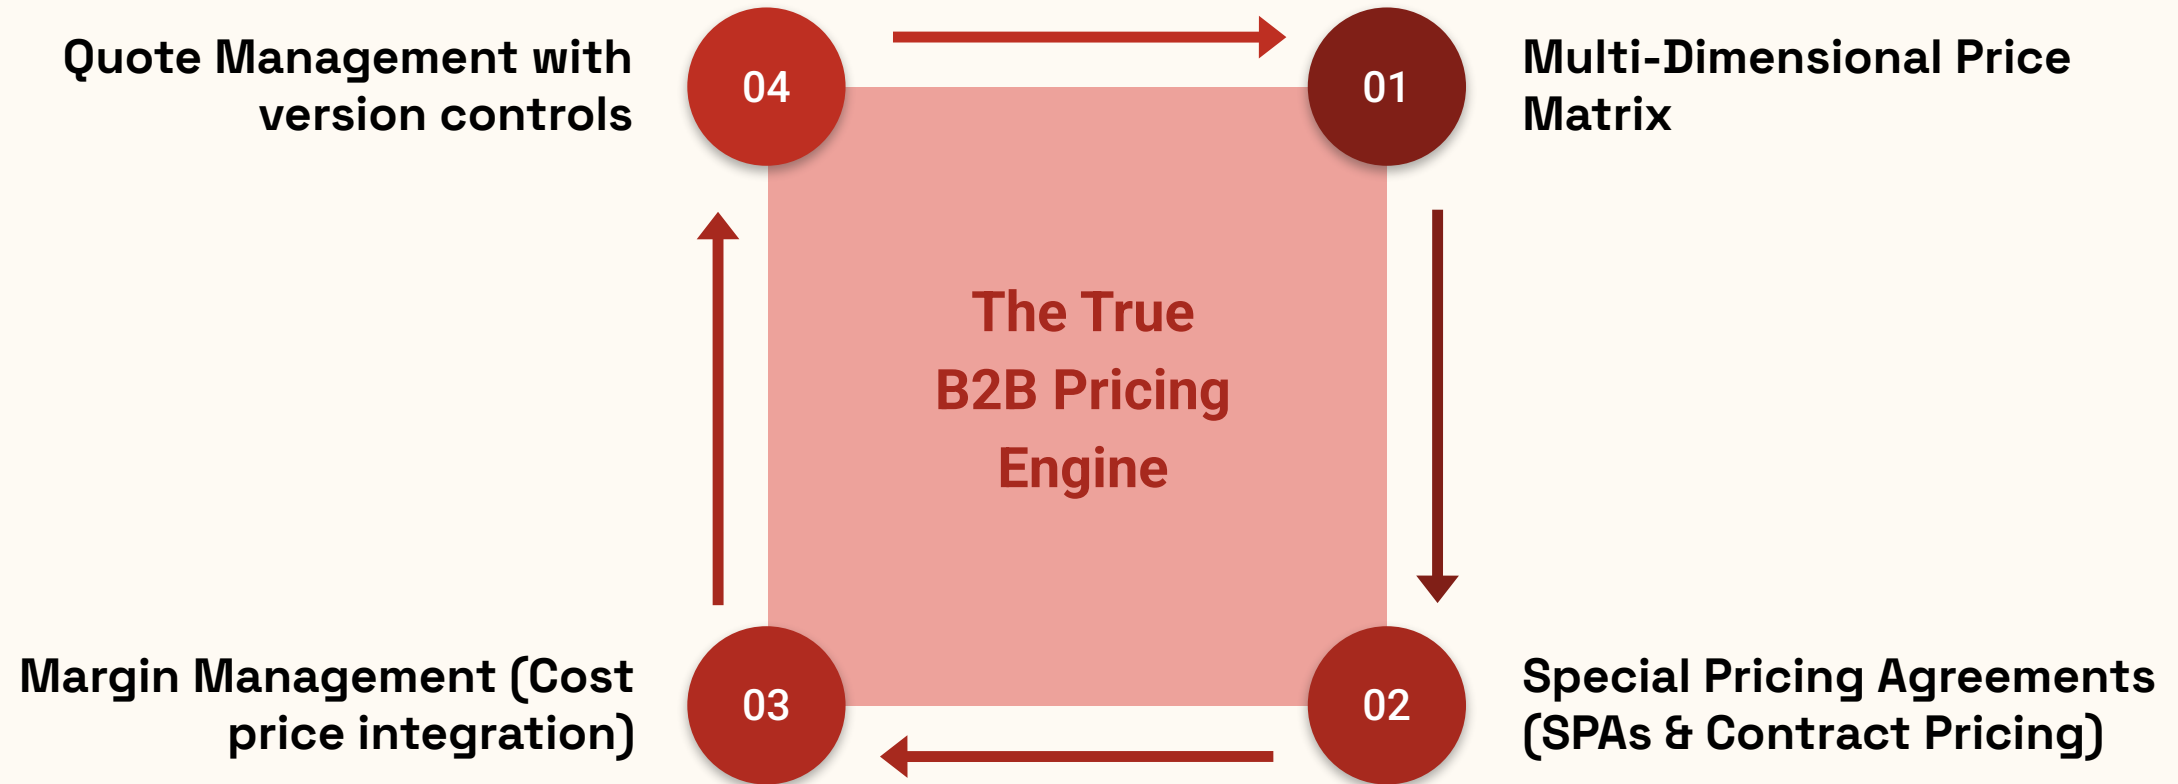

- Automated Quotes
- Automated Payment Collections &
- Product recommendations

The Growmax Advantage

01	Multi-Tier Pricing Model	• Not: Product → Customer • But: Product -> Pricing Tier -> Volume Bracket -> Time Period -> Customer
02	Approval Engine	• Rule based approval flow by discounts or margins • Multi-levels, Auto approval, Override discounts
03	Multi-warehouse & Multi-branch Orchestration	• Role based multi-branch, multi-warehouse management • Intelligent allocation with zone management
04	ERP Grade Integrations	• Native two-way SAP ECC integration with JCo • API & foundation ready for integration with any ERPs

“Complexity is NOT bad. This accurately represents B2B reality.”

Pricing Intelligence: Beyond “Discounts”

“AI-Powered dynamic pricing is under working.”

Partner Portal: Their Command Center

The screenshot displays the 'Customer Portal' interface. At the top, there's a navigation bar with a search bar and a shopping cart icon. The breadcrumb trail indicates the path: Industrial Fasteners > Screws & Bolts > Hex Head Cap Screw. The main product section features a large image of a hex head cap screw, labeled 'Best Seller'. To the right of the image, the product title is 'Heavy Duty Hex Head Cap Screw - Grade 8 Steel', with specifications 'M10 x 30mm Thread | Zinc Plated Finish | DIN 933 Standard' and SKU '1000147956'. The price is listed as '\$0.68 / unit', sold by 'Industrial Supply Co.' and shipped from Chicago. Below the price, there's an 'Estimated Delivery' date of 'Sep 28 - Oct 01' and an 'Availability' status of 'In Stock (2,450+)'. A quantity selector shows '100' units, with 'Add to Cart' and 'Request Quote' buttons. Below the product image, there are three smaller images of different screw sizes and a plus sign. At the bottom, a section titled 'Available from Authorized Partners' shows a table with two entries: 'Industrial Supply Co.' and 'Midwest Fasteners Inc.', each with their location, availability status, unit price, and an 'Add +' button.

PARTNER	LOCATION	AVAILABILITY	UNIT PRICE	ACTION
Industrial Supply Co. ★★★★☆ (4.8) Verified	Chicago, IL Ships in 24h	High Stock 5k+	\$0.65 Min. Order: 50	50 Add +
Midwest Fasteners Inc. ★★★★☆ (4.2)	Columbus, OH Ships in 2-3 days	Medium Stock 1.2k	\$0.68 Min. Order: 100	100 Add +

- Dashboard for managing their quotes, orders, inventory etc.,

- **Zero Critical Vulnerabilities** post-remediation from the latest assessment.
- **Continuous** Vulnerability Scanning integrated into development & deployment cycles.
- **Data Encryption at Rest & In Transit** ensuring protection of sensitive information.
- **Role-Based Access Control (RBAC)** to limit exposure and maintain data privacy.

“Your data. Your Control. Always.”

Partner Commerce Platform for Siemens

CASE STUDY

Siemens is one of the world's leading manufacturers of low-voltage and medium-voltage switchgear, offering comprehensive electrical distribution solutions for industrial, commercial, and infrastructure applications.

SIEMENS

Challenge

Siemens' sales teams & partner ecosystem prioritize top 20% customers driving 80% revenue, leaving smaller contractors and panel builders underserved despite significant collective volume and opportunity.

What We Did

- Growmax is rolling out our intelligent connected revenue operations platform between Siemens' internal inside sales teams, channel partners, and this underserved 80% customer base.
- Growmax creates scalable digital sales reps serving high-volume, lower-touch customers profitably.
- We enable Siemens to monetize underserved customers without increasing sales costs.
- Go live in India, Indonesia, Malaysia & Thailand by April 2026
- 300+ partners & 100K+ customers with integrated payment directly to partners

Spares Portal for Schwing Stetter

CASE STUDY

Schwing Stetter India, is a leading manufacturer of concrete construction equipment. It produces concrete batching plants, truck mixers, concrete pumps, and recycling plants, serving major infrastructure and real estate projects across the country.

Challenge

Schwing has **50+** sales offices with **800+** service engineers and **58** warehouses across India with more than **20K customers**.

Their service engineers used to manually give quote, order & their customers were unhappy because of delayed quotes and order process.

What We Did

- Created an AWS based architecture supports their scale & growth
- Unified customer experience portal for them to place orders at their contracted prices & their service engineers creating quotes & orders on the move
- Tightly integrated with their backend SAP ECC so that customer get the post order statuses on their portal

Scaling Partner Engagement for OBO Bettermann

CASE STUDY

OBO Bettermann is the German multinational, supplying electrical installation systems – cable support/routing, underfloor solutions, and safety products like lightning, surge and earthing protection – for industrial and commercial projects.

Challenge

OBO Bettermann India wanted to digitize its B2B selling process to improve customer experience and partner engagement across a 200+ dealer network, with 70+ internal staff users supporting the channel.

What We Did

- Launched a Partner Commerce Portal for self-service quoting, ordering, and tracking tailored to dealers.
- Integrated with ERP for price lists, credit, inventory, and order sync; set up role-based access and approvals.
- Built engagement visibility, dashboards, and alerts to track adoption and drive continuous improvements.
